

IFG020 V/A LAATIMINEN APAROILLE "Finnish punk hc compilation '08" 12"

*This classy compilation of newer Finnish hardcore is particularly notable for its large format and glossy text, which includes a concise history of early Finnish HC, as well as critical analysis of certain major bands and their defining styles. While it all makes for a fascinating read, the selection of recordings is quite strong: AIVOTTOMAT delivers a sharp mix, recalling TERVEET KÄDET's scorching vocals, while NOITUUS offers unbelievably trashing HC with the most minimal of live production values. Between these extremes, SOTATILA's rockin' approach and the distinctive humor of URBAN UNREST leave the strongest impression. Recommended!*
