

IFG026 **BESTHÖVEN** "Born to kill dreams..." 10"

10" disc with eight more discharges of "Dis-Cimex" from the one-man dismachine from distant Brazil, distinguished by disproving and disquieting any disappointment or dissatisfaction you'd think you'd discern or discover from a band disadvantaged from the potential disarray or disorder of distinguished by walls of torrentially distributed riffs at the (now disseminated worldwide) classic ANTI-CIMEX pacing and riffage, the dispatch by this disciple of DIS destroys any disillusionment as it disperses distinctive disharmonic dissonance and distortion. Lyrics discuss disgust with the disaster of war and distressed, disconsolate, disturbed feelings about war. No discarded tracks make this disk, nicely packaged in a gatefold sleeve. For the discriminating dis-fan.
