

IFG040 V/A POSLOUCHÁTE JIŽNÍ CECHY #3 CZ compilation 12"

*I've always been a fan of comps and zines that capture a particular area, and this compilation is an example of what makes these regional projects so cool. South Bohemia is known for ponds and hiking (according to Wikipedia anyways), but evidently, there's a glut of excellent bands from the not-very-populated region, too! Regular readers of this zine are no doubt familiar with Czech greats like GRIDE, JIL-AI, and INGROWING, but if you want to know more about lesser-known but still great bands like HIROSHIMA NIGHTMARE, RESORT, LIVER GARNISH, and UNFARKT along with a host of their other southern Czech brothers-in-arms, pick this up! This is the third installment of this comp, and as a fan of the two previous comps, I have to again say that the Czech Republic is the Japan of Europe: the number of amazing bands from this little country is astounding!*
