

IFG041 LYCANTHROPHY Full length 12"

This album truly embodies the spirit, attitude and concept of Short Fast & Loud! LYCANTHROPHY have been kicking around the Czech scene for over a decade now and this is their very first full length-unbelievable for sure. This offering from beginning to end was well worth the wait indeed. If yr familiar with this band then you already know what to expect-fast, female fronted core to the core! If yr not familiar with them then -GO HUNT THIS ONE DOWN ASAP! LYCANTHROPHY have really come a long way since that split cassette release with DICKLESS TRACY back when. Their brutality has forever stayed in tack, even with their change up from a more mincing style to a now more modern fast-core/p.v. mode. This band is right up there with all the other uber sick Czech bas-asses; GRIDE, LAHAR, SOUCAST STROJE, SHEEVA YOGA as well as DEBUSTROL. Sick cover art handled by SF&L homie Jeff Metal Sayers from WASTOID. This album is released on all formats by several different labels, so you have no excuses for not owning a copy of your very own.

SHORT FAST & LOUD #25 – December 2011

Insane face-melting grind from the Czech Republic. I'd pecked at a couple of their previous releases, but this thing takes their inhuman savagery to a whole new level: stop-start precision, skin-flaying riffs and rabid, lung-scraping vocals all wrapped up in a hefty punch-in-the-guts production as it spins dementedly toward the fiery pits of hell at 45rpm. If you like shit like Discordance Axis, Agents Of Abhorrence and Kill The Client then get yourself all over this NOW.
